

# Language technology jobs in the sun

*We're hiring!*

## Who are we?

- [Prompsit Language Engineering \(www.prompsit.com\)](http://www.prompsit.com), a language technology company in Elx, Spain, serving for more than 10 years private companies and public organisations with a myriad of automated linguistic services related to multilingual applications.
- [Universitat d'Alacant \(www.ua.es\)](http://www.ua.es), a public university located in Alacant, on the Mediterranean coast, with more than twenty years of research on machine translation and translation technologies.

## Work in language technologies in South-East Spain

You know language technologies are fun. We work with:

- modern artificial intelligence
- machine translation (MT) and computer-aided translation (CAT)
- natural language processing (NLP)
- big data and applications

South-East Spain is also fun:

- We're based in Elx and Alacant: nice mid-sized cities with palm trees, history, vibrant culture and lots of fun and festivities.
- Both Prompsit and UA are located in really nice university campuses at only 20 km from each other.
- We're close to both mountains and beaches. We enjoy excellent Mediterranean weather<sup>1</sup>: warm and sunny.
- Our airport is easy to fly to from most of Europe
- The cost of living here is very affordable<sup>2</sup> (47% cheaper than Dublin, 29% cheaper than Edinburgh, 17% cheaper than Trento, or 7% cheaper than Prague).
